

Ganeswara Manikanta Kumar Joga

Senior Software Associate | 5.5+ Years Experience

Hyderabad, India • +91 7036919586 • ganeswaramanikantakumar@gmail.com

PROFESSIONAL SUMMARY

Senior Software Associate with 5.5+ years of experience delivering scalable, high-performance frontend applications across enterprise, healthcare, maritime, and elder care domains. Specialises in React.js, TypeScript, and Redux, with a strong focus on component architecture, responsive design, and accessibility. Comfortable leading frontend across multiple concurrent products — from initial architecture through code reviews, deployment, and ongoing maintenance. Known for translating complex business requirements into clean, intuitive user experiences while keeping codebases maintainable and teams aligned.

PROFESSIONAL EXPERIENCE

Senior Software Associate

XRG Consulting Pvt Ltd • Hyderabad

Aug 2024 – Present

AI-Powered Enterprise Application Builder

- Architected a configurable, AI-driven low-code platform enabling rapid enterprise application development; implemented entity/master data modeling, RBAC, workflow automation, dashboards, forms, reports, notifications, and user management.
- Led frontend delivery across 4 concurrent client products end-to-end, from architecture decisions through deployment.
- Established and enforced coding standards, conducted regular peer code reviews, and mentored junior developers to maintain high output quality.

Anvayaa KinCare – Caregiver Management Platform

- Designed and built responsive UIs for care scheduling, caregiver assignment, activity tracking, customer request management, and operational dashboards.
- Implemented real-time notifications and reporting features that improved service monitoring efficiency for elder care operations.

Enviro – Elder Care Services Web App

- Developed a consumer-facing web app enabling elderly users to browse, book, and manage elder care services; built in close collaboration with the Anvayaa platform team.

Global eCare – Maritime Medical Management System

- Built a healthcare compliance platform for shipping companies covering employee medical examination workflows, appointment scheduling with authorised medical centres, test result tracking, and DG-certified doctor review/approval processes.

Software Developer

Kagami India Pvt Ltd • Hyderabad

Sep 2021 – Jul 2024

ERP Solution using Low-Code / No-Code

- Engineered a library of reusable, dynamic React component modules that powered enterprise applications across 10+ industries, significantly improving UI consistency, scalability, and development velocity.
- Built a visual-configuration-based low-code/no-code ERP platform capable of generating fully functional runtime applications, eliminating repetitive custom development and accelerating client time-to-delivery.
- Collaborated with cross-functional teams to gather requirements, iterate on UI designs, and release stable features on schedule.

Software Engineer

Brillio Technologies • Bangalore

Nov 2020 – Sep 2021

Budget Scheduling & Estimation System

- Designed and developed a full-featured budget and cost management web application with modules for budget planning, cost tracking, financial reporting, and project resource management.
- Collaborated with cross-functional Agile teams to design application features using JavaScript and modern frontend technologies, consistently meeting sprint delivery targets.

EDUCATION

B.Tech – Electronics & Communication Engineering Kakinada Institute of Engineering and Technology, Kakinada • Graduated 2019

TECHNICAL SKILLS

Languages

JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries

React.js, Redux, React Hooks, Context API, React Router, Axios, JWT Auth

UI & Styling

Tailwind CSS, MUI (Material UI), Ant Design, Bootstrap

Dev Tools

Vite, Webpack, Jest, React Testing Library, ESLint, Prettier, Git, GitHub

Deployment

Vercel, Netlify, Render

Payment Gateways

HDFC, CCAvenue (ICICI), Razorpay — UI-level integration

Project Management

OpenProject, Azure Boards, Trello

Practices

REST APIs, RBAC, Responsive Design, Accessibility (WCAG), Agile/Scrum, Code Reviews, Performance Optimisation

KEY STRENGTHS

■ Enterprise React architecture

Designing scalable component trees and state management patterns for large apps.

■ AI & low-code platforms

End-to-end ownership of configurable, AI-driven enterprise application builders.

■ UI component libraries

Building reusable, consistent component systems across 50+ enterprise products.

■ Performance & accessibility

Optimising load times, rendering, and WCAG compliance across all projects.

■ Team leadership

Code reviews, standards enforcement, and mentoring in cross-functional Agile teams.
